

# ACHYUT RANJAN GOGOI

---

PhD Candidate in Chemistry (Computational Organic & Iron Catalysis)

Texas A&M University | Anticipated Graduation: April 2026

Email: [achyutrgogoi@tamu.edu](mailto:achyutrgogoi@tamu.edu) | [achyutrgogoi@gmail.com](mailto:achyutrgogoi@gmail.com) | Phone: +1 979-402-9543

## SUMMARY

PhD candidate in Chemistry with **4+** years of experience driving innovation at the interface of computational modeling, synthetic methodology, and spectroscopic analysis of organic and inorganic transformations. Demonstrated excellence through **15+ high-impact publications** and collaborative research with leading groups across **10+ universities**. Expertise in mechanism-driven catalyst design and sustainable catalysis with direct applications in pharmaceutical R&D. Seeking R&D roles leveraging skills in mechanism-guided synthesis design and molecular modeling.

## CORE SKILLS

Computational Chemistry (DFT & MD) | Cross-functional Collaboration

★★★★★  
5.0

Organic Synthesis: Asymmetric Catalysis | Reaction Mechanism Elucidation

★★★★☆  
4.5

Mössbauer Spectroscopy | Inorganic Synthesis | Coding (Python, C++)

★★★★☆  
4

## EDUCATION

PhD Chemistry, Texas A&M University (2021–Present) – GPA: 3.75

M.Sc. Chemistry, IIT Bombay (2021) – CPI: 9.69

B.Sc. Chemistry, University of Delhi (2019) – CPI: 9.59

## TECHNICAL SKILLS

Instruments: Mössbauer Spectrometer, NMR, RI-NMR, FT-IR, UV-Vis, Fluorometer, Polarimeter

Programming: Python, C++, Arduino, FORTRAN, MySQL

Software: Gaussian, ORCA, GAMESS, Avogadro, AutoCAD

## RESEARCH EXPERIENCE

- Developed innovative **asymmetric** multicomponent iron-catalyzed cross-coupling strategies for the **stereoselective synthesis** of chiral boronic esters; elucidated detailed mechanistic pathways through integrated **DFT** modeling and **Mössbauer spectroscopic** analysis.
- Utilized advanced tools (**DFT & Molecular Dynamics**) to investigate mechanisms across iron, nickel, and rhodium and metal-free catalytic transformations leading to high impact publications.
- Collaborated with groups across the globe (ICIQ, UChicago, Northwestern, UW–Madison, Oxford) resulting in **15+ high impact publications**.
- **Mentored 8 junior** researchers and co-led iCarbon, an initiative bringing computational chemistry education to underrepresented community college students.

## SELECTED PUBLICATIONS

Co-author of **16** peer-reviewed articles (**2 First author, 7 second author**), including in Nature Catalysis, Nature Communications, JACS, ACS Catalysis, Chem, Angew. Chem., Org. Lett. etc. 2 more first author manuscripts under preparation.

1. [Gogoi, A. R.](#); Rentería-Gómez, A.; Tan, T. D.; Ng, J. W.; Koh, M. J.; Gutierrez, O. Iron-catalyzed radical difunctionalization of alkenes. *Nat. Synth.* **2025**, *Accepted*.
2. [Gogoi, A. R.](#); Usman, F. O.; Mixdorf, J. C.; Gutierrez, O.; Nguyen, H. M. Rhodium-catalyzed Asymmetric Synthesis of 1,2-disubstituted Allylic Fluorides. *Angew. Chem. Int. Ed Engl.* **2023**, *62*.
3. Targos, K.; [Gogoi, A. R.](#); Rentería-Gómez, Á.; Kim, M. J.; Gutierrez, O.; Wickens, Z. K. Mechanism of Z-Selective Allylic Functionalization via Thianthrenium Salts. *J. Am. Chem. Soc.* **2024**, *146*, 13689–13696.

## SELECTED TALKS & PRESENTATIONS

- ACS Fall 2024, Denver – Oral Presentation
- Gordon Research Conference 2023 – Poster Presentation
- CIC Systemwide Meeting 2025 – Virtual Talk
- SACNAS Diversity in Science Symposium 2023 – Poster Award (**3rd Place**)
- TPOC Monthly Meeting – Virtual Talk on Sustainable Iron Catalysis

## LEADERSHIP & SERVICE

- Secretary, Phi Lambda Upsilon (PLU), Texas A&M University Chemistry Honor Society
- Chemistry Student Safety Committee member at Texas A&M, Chemistry Department
- Co-led iCarbon – An outreach program to teach computational chemistry to underrepresented students in community colleges.

## ADDITIONAL INVOLVEMENT

ACS Member | CIC (Catalysis Innovation Consortium) Student Ambassador | Recruitment & Open House Team Member in Texas A&M University Chemistry
